## Split System Air Conditioners

### Olympian® 10

The low profile York Olympian® Series is built to the same exacting quality standards demanded of all York equipment, and has earned its own reputation for dependability, quiet operation, and efficiency. Models include: • Olympian 10 Air Conditioners (HRA) • Olympian three-Phase Air conditioners (HRA) As with all York condensing units, the HRA models are designed to be custom-matched with a York evaporator section. Matching air handlers are available for upflow, downflow, and horizontal applications. Electric heaters, Gas and Oil furnaces, and add-on coils are also available. With efficiency ratings ranging from 10 SEER to as high as 15.3, when matched to a compatible variable-speed air handler, the Olympian Series is the niche line for homeowners in search of highly affordable home comfort, in terms of both initial installed cost and long-term operation. Available in Three-Phase 208/230 and 460 volts. Select from 3, 3-1/2, 4, 5, 6-1/2 and 7-1/2 Ton.

### Stellar® 2000

The York Stellar® 2000 Series is the preeminent line of residential central air conditioning systems in the HVAC industry. As with all York condensing units, the HDB models are designed to be custom-matched with a York evaporator section. Matching air handlers are available for upflow, downflow, and horizontal applications. Electric heaters, Gas or Oil furnaces, and add-on coils are also available. Throughout the entire line, the York Stellar Series enjoys a reputation for uncompromised quality in design, engineering, and manufacturing. It is a standard earned through the satisfaction of millions of homeowners and other customers throughout the world. When customers demand dependability and unparalleled home comfort, they insist on the York Stellar Series.
