To whom it may concern:

Stores and Equipment, has been a user of Catalog Builder for 2 ½ years. Before Catalog Builder, we were trying to create a catalog using Microsoft Word. Microsoft Word was unstable and very time consuming. Catalog Builder has proved to be stable and user friendly. We maintain over 6,000 items in our catalog, and over 700 color pictures.

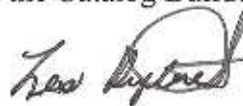

Computer Pundits has been very responsive to customizing Catalog Builder to meet our needs. CPC has also developed a CD, and catalog for our website.

CPC has made upgrades of the program available to us, with training.

The technicians and support staff are very responsive and handle your questions in a professional manner.

Catalog Builder, has saved countless man-hours. The automatic indexing, and ease of adding new items and deleting old ones help keep maintenance hours to a minimum.

I highly recommend Computer Pundits, and the Catalog Builder program to any company that has a need for a catalog.
